BIZZARTO
OUTDOOR

Collections that can stay outdoors all year long, no matter the weather.

Waterproof collections

BIZZARTO
OUTDOOR

All year long
outdoor use!

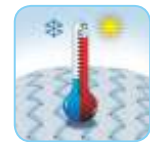

impermeable

antifungal, antibacterial
protection

high resistance to fading

low and high
temperature resistance

stain resistant,
easy to clean

IMPERMEABLE

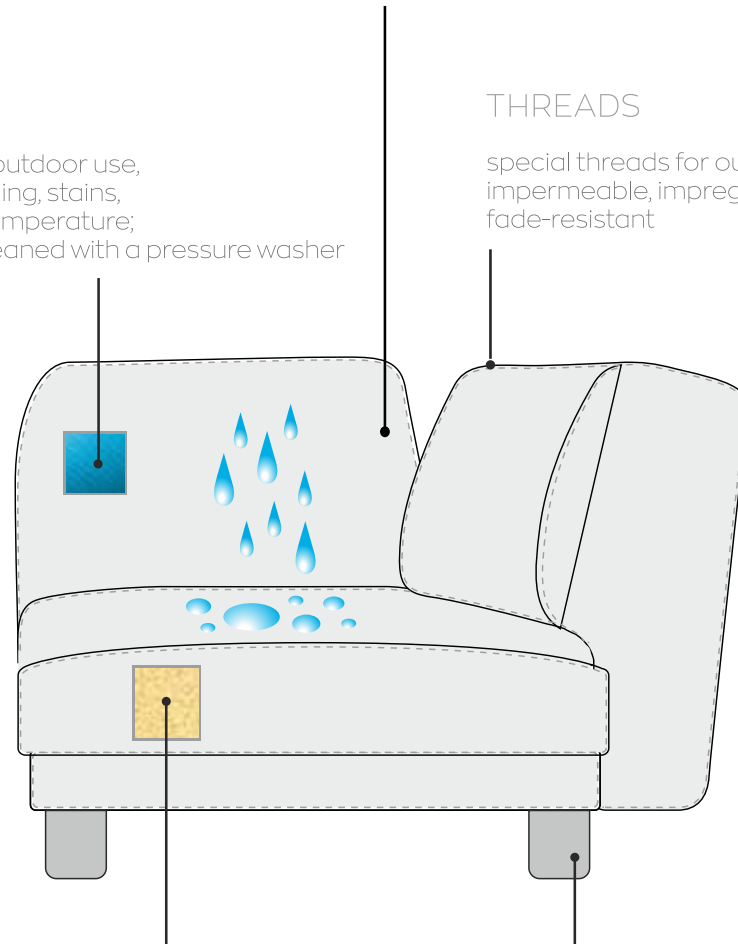

waterproof vinyl fabrics,
as used for equipping high quality yachts.

FABRICS

dedicated for outdoor use,
resistant to fading, stains,
high and low temperature;
they can be cleaned with a pressure washer

THREADS

special threads for outdoor use,
impermeable, impregnated,
fade-resistant

FOAMS

dedicated for outdoor use,
with anti-mould and antifungal protection;
allergic friendly

FRAME, FEET

frame: aluminium or styrofoam highly resistant
to deformation;
feet: anticorrosive protected metal, pvc or aluminium

The upholstered furniture from BIZZARTO outdoor collections, can spend outside all year round, as well summer as winter. There's no need to hide them, when it rains or snows because they're made in technology that makes them waterproof. After the rain just wipe water off with a dry, clean cloth and sit on the sofa. Our furniture is resistant to high and low temperatures.

They are available in a wide range of upholstery colours. We choose only the highest quality fabrics, from the best global suppliers, specializing in the production of fabrics for external use. Apart from their attractive appearance and high durability, they are very easy to clean - dirt does not penetrate into the fabric, so they can be washed with water. You do not need to be afraid even a red wine or chocolate (for more information on how to take care about fabrics, see catalogue p. 34)

With BIZZARTO outdoor collections you can have an elegant living room in the garden all year round.

threads for outdoor use

FOAMS

dedicated for outdoor use,
with anti-mould and antifungal protection,
allergic friendly

FRAME, FEET

made of corrosion protected metal,
aluminium or pvc

100% OUTDOOR&INDOOR

They can stay outside all year long. Night and day. During the rain and sunny weather. But they are also perfect for indoor use. Their unique design and excellent comfort make them an attractive element of any modern winter garden.

TECHNOLOGY

The furniture is manufactured using „water goes thru” technology - water (e.g. rain) can flow through it like through a strainer. This means that after an hour in full sun the furniture is dry again.

The components used make it resistant to various weather conditions - rain, snow, UV radiation, high and low temperatures.

UPHOLSTERY MATERIALS

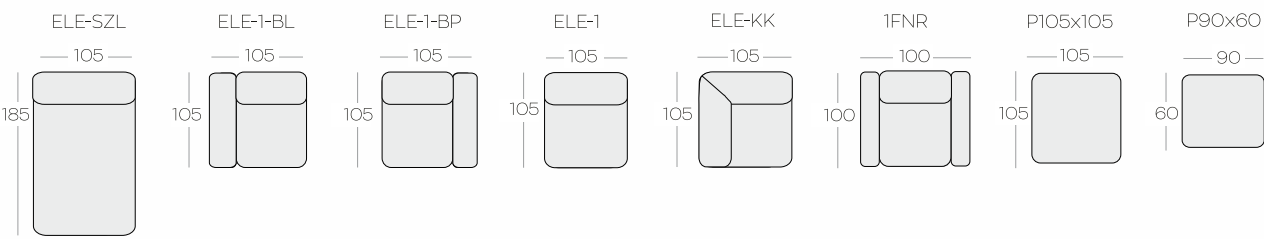

We only select top quality fabrics for our furniture, from the world's leading manufacturers specializing in the production of fabrics for outdoor use. In addition to compelling aesthetics and high durability, they are very easy to clean - dirt does not penetrate into the fabric. Therefore even wine or chocolate stains can be washed off just with water. For more information on how to take care about fabrics, see catalogue p. 34

FURNITURE COVERS - PROTECT YOUR FURNITURE AND KEEP IT IN A GOOD CONDITION

Our garden furniture is easy to keep clean and it can stay outside even during bad weather, but it should be protected with special covers that we provide with the furniture. Covers will protect furniture from dirt that is in the air and falling with rain or snow, pollen from trees, birds and insects, falling leaves. It takes literally a moment to put the cover on and take it off, and thanks to them your sofa or corner sofa is well protected, in perfect condition and will serve you for years, regardless the season. Thanks to the furniture covers you can take advantage of every nice day, even in autumn or winter, to sit in your garden. Even if there's snow all around. And after rain pours, you won't have to wait until the furniture dries out.

The covers are made of high quality fabric, very durable and resistant, specially dedicated for outdoor use. It is a high quality, breathable material that maintains proper air circulation. The covers can be washed in washing machine in warm water (max. 30°C/86°F), do not tumble.

FABRICS’ CLEANING AND CARE

The fabrics we use for our outdoor furniture are very easy to clean. Usually water is enough to wash away even wine or chocolate stains. But the clue is the word: regularity. The furniture should be vacuumed and washed with a mix of weater and a mild cleaning agent, at least once a week, to remove dirt before it penetrates the fabric structure. Any stains should be removed immediately. Such systematic care of furniture (even if it is covered with covers) will make it look perfect for years.

How to clean stains::

- remove excess of spilled substance using a clean, soft cloth;
- in case of oil stains, use absorbent substances (such as corn or potato starch), then remove it without pressing into fabric (use a tool with a straight edge e.g. ruler) and continue the cleaning process with a mix of water and mild cleaning agent;
- clean the dirt only with a clean, soft, light-coloured cloth or a brush with very soft bristles;
- do not rub the dirt into the fabric, clean the entire surface of the fabric from seam to seam, avoiding excessive wetting;
- first check on a small area and less visible part of a furniture, if the mix of water and a cleaning agent will not be harmful to the textile.
